

Directions for making the flash cards.

'What Insect Am I?'

Cut on the dotted lines horizontal across and fold on the vertical that go up and down lines.
You can either tape or glue to make the flash card.

WHAT AM I?

WHAT INSECT AM I?

Vocabulary Sight Word Definitions:

Butterfly - a kind of insect that has a long thin body and brightly colored wings and that flies mostly during the day

Caterpillar - a small creature that is like a worm with many legs and that changes to become a butterfly or moth

Chrysalis- a hard case that protects a moth or butterfly while it is turning into an adult

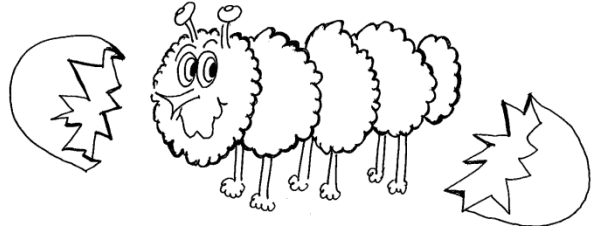

Metamorphosis- a major change in the form or structure of some animals or insects that happens as the animal or insect becomes an adult

Nectar - a thick juice made from a particular fruit or a sweet liquid produced by plants

caterpillar

The beginning...

I hatch from an egg. I am a caterpillar.

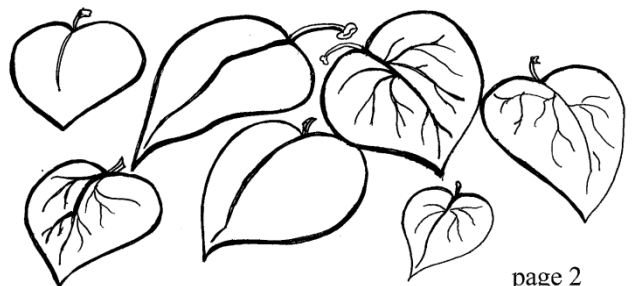

Vocabulary word: caterpillar

page 1

What do caterpillars do?

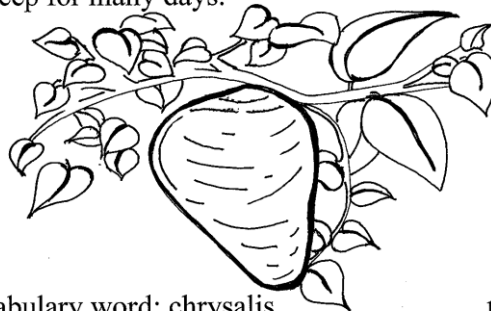

I crawl away. I am hungry. I eat a lot of leaves.

page 2

chrysalis

I am special that I can attach myself to a branch and make my own sleeping bag called a chrysalis. I go to sleep for many days.

Vocabulary word: chrysalis

metamorphosis

While I am sleeping my body changes and this is called metamorphosis. When I unzip my sleeping bag, I am wet. The sun dries me.

Vocabulary word: metamorphosis

How many does a butterfly have?

Antennae

Wings

Legs

I have 2 antennae.

I have 4 wings.

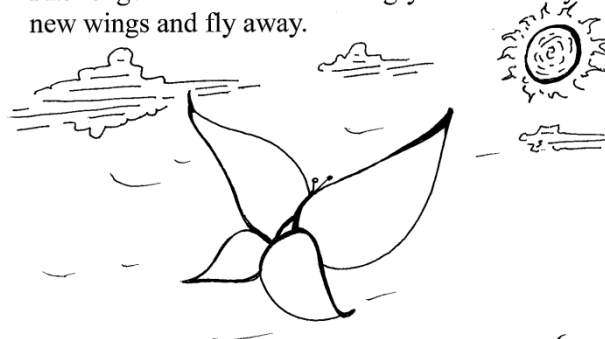

I have 6 legs.

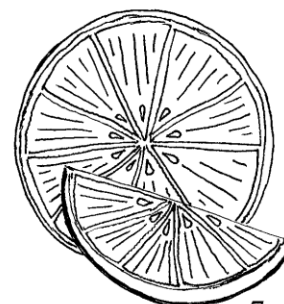

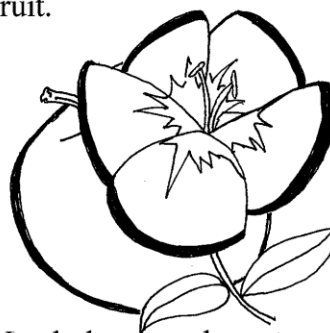

Does the butterfly that was a caterpillar no longer eat?

I no longer eat leaves. I am hungry. I look at my new wings and fly away.

nectar

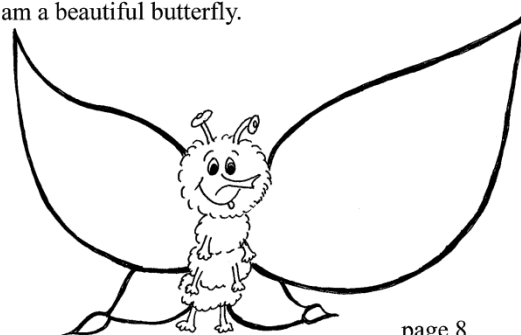

I eat sugar called nectar that I find on flowers and fruit.

Vocabulary word: nectar

What did the caterpillar turn into?

I am a beautiful butterfly.

THE END.
